

Everyday help. Choices, still yours.

We are building a daily-life AI assistant for older adults and their caregivers. A simple request becomes a clear next step, with the person always in control.

A LITTLE HELP GETTING THERE

Voice and text. Readable screens. A moment to review before important actions.

OLDER ADULTS + CAREGIVERS

INITIAL MARKET: SOUTH KOREA

One request. A clearer way forward.

Small screens and unfamiliar steps can turn ordinary tasks into obstacles. Dabom is designed around what a person wants to do, rather than the menus they need to learn.

A ride to an appointment

Explain the pickup, destination, fare, and confirmation step in everyday language.

A meal chosen by you

Make meal selection, delivery details, and the order total easier to understand.

DESIGNED FOR THE MOMENTS THAT MATTER

- 01 ASK** Speak, type, or choose a large example button.
- 02 UNDERSTAND** Get short explanations and manageable steps.
- 03 CONFIRM** Review the details yourself or with a caregiver.

Images are AI-generated illustrations of the intended product experience.

A focused path to launch.

Our first market is South Korea. We are developing a voice-first experience for older adults, with a caregiver view for reviewing important requests.

01

Build the core assistant

Combine conversation, speech input, readable guidance, and request history.

02

Validate with people

Test clarity, task completion, and caregiver review with older adults and families.

03

Connect the right services

Develop remote review and service integrations with consent and clear confirmation.

04

Launch a dependable experience

Release in South Korea with support, privacy practices, and monitored service quality.

WHY CLAUDE

We plan to use Claude for intent understanding, helpful follow-up questions, clear explanations, and caregiver summaries. Coding support and guidance on speech-recognition integration will help us build and evaluate these flows.

Explore the product experience at dabomlife.com. The interactive demo illustrates guidance and confirmation without placing real orders or payments.
